SUMMARY

Third-year BSc (Hons) in Information Technology & Management undergraduate at the University of Moratuwa seeking a Software Engineering Internship. Experienced in developing software solutions through academic and practical projects, with hands-on experience in Java, Python, JavaScript, TypeScript, React, Next.js, Flask, PostgreSQL, MySQL, Supabase, Docker, and REST APIs. Strong interest in software engineering and DevOps, with strengths in problem solving, system design, teamwork, leadership, and adaptability. Passionate about building reliable, scalable, and user-focused software solutions.

WORK EXPERIENCE

Data Entry Operator, Pepsi – Kegalle Distribution Office (Jun – Sep 2023)

- Performed accurate data entry and assisted with stock management and distribution logistics records.
- Ensured consistency and quality of distribution data across operational systems.

Internship Trainee, Peoples Bank – Kegalle City Branch (Sep – Nov 2023)

- Promoted bank digital products and services to customers as a trainee cashier.
- Assisted with day-to-day banking operations and customer service procedures.

Internship Trainee, Bank of Ceylon – Kegalle Super Grade Branch (Nov 2023 – Mar 2024)

- Supported branch operations and back-office administrative tasks.
- Promoted bank digital products and services to customers.

EDUCATION

Bachelor of Science (Honours) in Information Technology & Management

- [University of Moratuwa](#) (UOM)
- Expected Graduation: 2028
- Batch: 23

G.C.E Advanced Level Examination | 2022

- [St. Mary's College](#), Kegalle
- Results: Accounting: A | Economics: A | ICT: B (z-score: 1.5279)

KEY PROJECTS

Shipment Alerting System (SAS) Client Project

Nov 2025 – Aug 2026

Role: Backend & Security Developer | GitHub Integration

- Developed a web-based shipment monitoring system integrated with CargoWise via REST API to track shipment milestones, identify overdue shipments, and generate automated alerts.
- Implemented **Supabase Authentication, JWT-based authentication, and Role-Based Access Control (RBAC)** to ensure secure user access.
- Developed user management, audit trails, access logging, and system settings to support system security and accountability.
- Managed the team's **GitHub workflow**, including branch management, code integration, and collaborative development.
- **Technologies:** Next.js, TypeScript, Python, Flask, PostgreSQL, Supabase, JWT, APScheduler, Nodemailer, GitHub, Postman
- GitHub: https://github.com/Nadeesha-Maduwantha/SAS_project

Seal Master - Automated Document Sealing System

Jan 2025 – Aug 2025

Role: Team Leader / Hardware Developer

- Developed an automated document sealing machine with multi-pattern seal selection, automatic stamping, and real-time paper and ink-level monitoring.
- Designed a custom PCB using EasyEDA and implemented UART communication between ESP32 and Arduino Uno.
- Controlled NEMA17 stepper motor using A4988 and led overall hardware integration.
- **Technologies:** Arduino Uno, ESP32, C/C++, UART, NEMA17, A4988, MG995 Servo, HC-SR04, IR Sensor, TFT Touchscreen, EasyEDA

Ape Bodima – Boarding Finder Platform

Jun 2024 – Present

- Developed a web platform that helps university students find nearby boarding places with room availability and accommodation details.
- **Technologies:** Next.js, MongoDB, Postman API
- **GitHub:** <https://github.com/ShenSandaru/Ape-Boadima-LK>

TECHNICAL SKILLS

Frontend

- HTML | Next.js | CSS | Tailwind CSS

Backend

- Flask | Node.js

Database

- PostgreSQL | MySQL | Supabase

Programming Languages

- C | Java | Python

Frameworks & Tools

- Supabase Auth | JWT | RBAC | APScheduler | Postman

Other

- Git | Github
